

International Power Single Output DC Power Supply IHC12-3.4

Description

The International Power "open frame series" are a high reliability line of regulated open frame linear DC power supplies designed to operate over the wide range of AC power sources found worldwide. This feature simplifies your inventory and service consideration by allowing the use of one standard power supply regardless of destination.

These models are designed to meet many domestic and international regulatory agency requirements. If you plan to distribute your products worldwide, obtaining necessary agency approvals can be greatly simplified by specifying the International Power "open frame series".
